

Good Practice Guide Appendices Appendix 2

Definition of the Primary Care Cluster

The Health Board Directors of Primary and Community Care have refreshed the working description of clusters in September 2018:

"A cluster brings together all local services involved in health and care across a geographical area, typically serving a population between 25,000 and 100,000. Working as a cluster ensures care is better co-ordinated to promote the wellbeing of individuals and communities."
